This group last met in Coventry in Sept 2011.

A scheduled meeting is taking place on 18th and 19th October 2012 in Warwick

The UK Haemophilia Data Managers Forum (UKHDMF) has a current membership of 46. This group consists of Data Managers, CNS, Service/Operational/Service Managers that represent all Haemophilia Centres in the UK and Ireland.

The forum was set up in 2005 to aid and support Haemophilia Centre staff in data collaboration/collection and processes. An essential part of this process is ensuring that a continued communication loop is established with Centres, UKHCDO (NHD) and MDSAS (HCIS). The aim of this group is to set up a network of support and feedback forums to aid work streams across Haemophilia Centres.

The importance of data collection continues to be of major importance particularly in the current economic climate. Financial cutbacks and continuous pressures on resources highlight the need for Haemophilia Centres to produce accurate and 'fit for purpose' data both locally and nationally.

The agenda for the forthcoming meeting is:

MDSAS update (HCIS, HAEMTRACK)

UKHCDO update

Creation of sub-group to process/pilot data requests, plan and support data collection. submissions

Brainstorming sessions covering:

- The role of the Data Manager
- Collating and Submitting data
- Challenging tasks
- MDT working
- Support structures
- Communication/working together
- Goals and Aspirations
- Agreements

We would like to thank all the UKHDMF members for their continuous efforts and hard work in producing vital information, aiding NHS Trusts/Commissioning bodies and the NHD to allow patients with associated bleeding disorders a continuous healthcare pathway to improved care. We would also like to thank UKHCDO and MDSAS in supporting this group and to Nancy Brodie and Lynne Dewhurst for starting this group up in 2005 and for their hard work and continuous support for all our members.
