

BCSH Haemostasis and Thrombosis Task Force

Membership

Dr D Keeling	Chairman
Dr H Watson	Secretary
Dr I Jennings	
Dr E Gray	NIBSC representative
Dr E Chalmers	
Prof M Laffan	
Dr A Mumford	
Dr C Tait	BSHT representative
Prof I Walker	NEQAS Representative
Prof M Makris	UKHCDO Representative

UKHCDO guidelines published in association with the BCSH

Collins PW et al. Diagnosis and treatment of factor VIII and IX inhibitors in congenital haemophilia. *British Journal of Haematology* 2013; 160:153-170

Collins PW et al. Diagnosis and management of acquired coagulation inhibitors: a guideline from UKHCDO. *British Journal of Haematology* 2013; 162: 758-773

BCSH guidelines in development

Monitoring of anticoagulants

Clinical genetics services for haemophilia

The treatment and prevention of bleeding in heritable platelet disorders

Patient based point of care testing for patients on vitamin K antagonists

Cancer and thrombosis

UKHCDO relationship with BCSH Task Force

There is a well-defined pathway for guidelines of UKHCDO working parties to be published in collaboration with the BCSH. There are significant advantages in getting guidelines through the BCSH, not least of which is publication in a Wiley-Blackwell journal – usually *British Journal of Haematology* or *Haemophilia*.

If any working party is intending to publish a guideline, they should contact Mike Makris (the UKHCDO representative on the Task Force) at an early stage to get the production of the guideline approved under the BSCH methodology.

Professor Mike Makris
