

## Obstetric Task Force

The task force was initially established by Charlie Hay, to revise and update the 2006 UKHCDO guidelines on management of pregnancy in women with congenital bleeding disorders, or carriers thereof.

Chairmanship was handed over to Sue Pavord in February 2015.

The guidelines are being developed in conjunction with the Royal College of Obstetricians and Gynaecologists; the scoping and literature search has been conducted in accordance with their usual procedures. The aim is to produce a green topped guideline, targeted at haematologists, obstetricians, neonatologists and anaesthetists.

The first draft has been reviewed by the RCOG. The second draft will be submitted to RCOG by 03.01.2016. The next steps will follow the usual RCOG processes of peer review with online publication scheduled in 2017.
