

Genetics Working Party

Membership

John Pasi	Chair
Keith Gomez	
Mike Laffan	
Nicola Curry	
Steve Keaney	
Gerry Dolan	

Remit

1. Continue role as oversight committee for issues related to genetics in haemophilia
2. Annual guideline review
3. Support thrombogenomics programme and roll out through bioresource programme
4. Achieving full genetic analysis of all patients on NHD
5. Gene therapy - trials and consent issues

Meetings and work streams

The group meet to discuss the remit and review the state of current issues within the field of genetics related to haemophilia.

The thrombogenomics programme and support for it was seen to be the primary role of the group, and will be discussed at the AGM.

A proposal to draw up a 'best practice' guideline for consent issues related to gene therapy trials has been discussed at the Advisory Group subsequently and considered a useful way forward.
