The VWD working party was reformed in 2017 and the above membership agreed. The working party has not met since the last AGM.

Following the revised guidelines diagnostic categories and registration criteria there remains some work to complete on the revised registration form. This is ongoing with NHD.

A successful application was made to the Data Analysis Group for release of data which will allow the 'Impact of revised classification on VWD registration in the UK' to be assessed.

The 2014 guidelines will be reviewed in light of forthcoming ASH guidelines on diagnosis and management of VWD but do not require rewriting at present.
