

Dental Task Force

Membership

Dr Julia Anderson

Chair

Dr Bella Madan

Dr Emily Symington

Dr Alice Taylor

Dr Sara Boyce

Remit

The main aim of the Dental Task Force is to update the 2013 guidance published in the British Dental Journal regarding new anaesthetic techniques and advances in haemophilia care, such as gene therapy and use of emicizumab. The readership will be wide and will include haemophilia treaters as well as high street dental practitioners, oral surgeons and paediatric dental practitioners.

Work is in very early phase with a view to inviting adult and paediatric dental colleagues from December 2021 onwards, and first meeting to be arranged for early January 2022.

Dr Julia A M Anderson
